Active Minds® Presents The Erie Canal
Wednesday, February 9, 2022 - 3:00PM – 4:00PM

The Erie Canal was an engineering marvel that altered the course of the early history of the United States. The Canal, once thought to be an impossible task, changed the economic profile of the country and provided a major catalyst for industrialization and growth. The Canal's story is a tapestry of backroom political dealings, surging boomtowns, and surveyors who had never worked on a canal project. Join Active Minds as we discuss one of the most influential and impressive feats of civil engineering in American history.
